

Sunfab Hydraulics AB

Pumps, motors and accessories

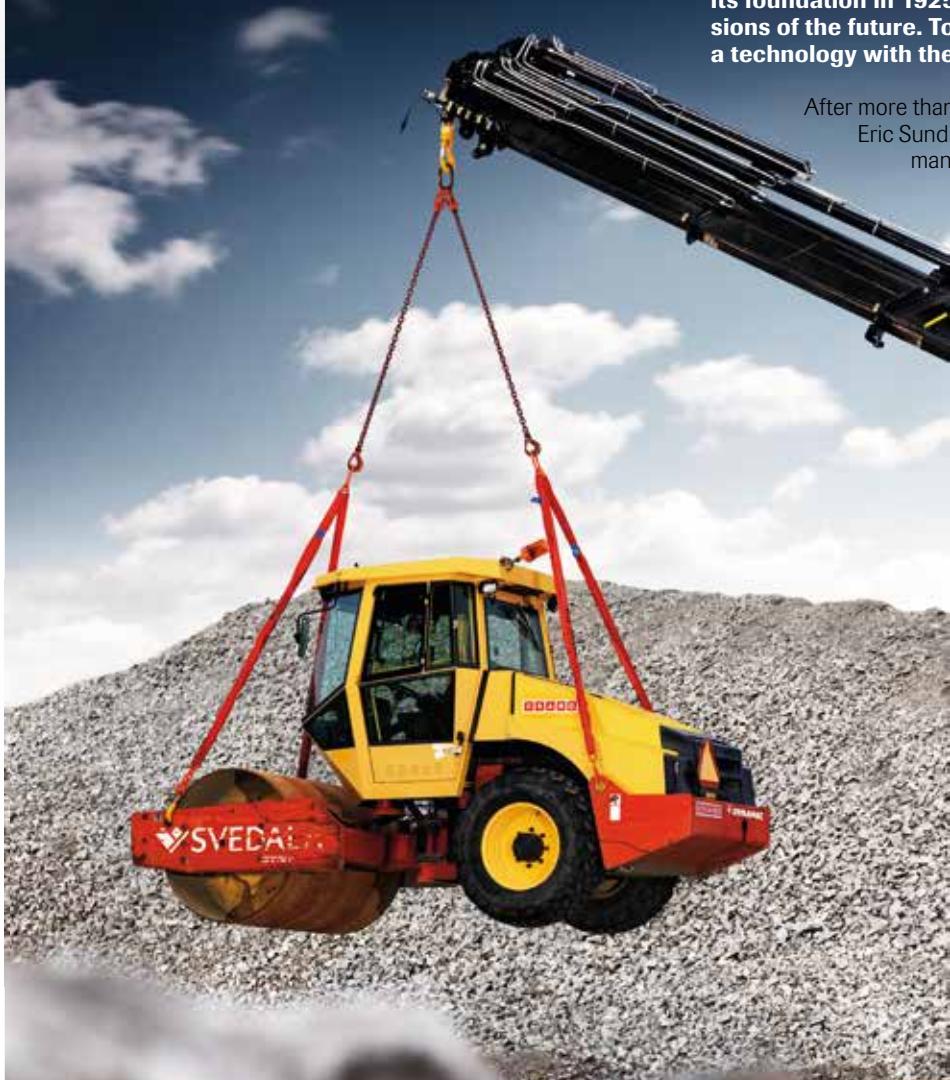

Pumps

Hydraulic pumps for all. Sunfab's range of hydraulic pumps is among the most complete in the world. Single flow from 12–130 cm³/rev, dual flow from 20/20–76/76 cm³/rev and variable flow from 62–130 cm³/rev. Maximum working pressure up to 400 bar, shaft / flange design in DIN, ISO and SAE standard, for mobile and industrial applications.

Variable pumps for mobile hydraulics. Variable pumps designed for demanding operations in hydraulic systems for forestry cranes, general duty cranes, sludge pump trucks, refuse collection vehicles, etc. An energy-efficient pump that ensures optimal regulation of the flow. Available in DIN and SAE designs.

Driven by innovation

Technologically advanced
originated from the company's

sions of the future. To
a technology with the

After more than
Eric Sund
man

Advanced hydraulic pumps, motors and, in particular, the first mobile lifting crane all technology used by Eric Sundin during the ski production in Hudiksvall. Ever since 1925, Sunfab has been a family company characterized by innovation, skills and vision. Today, Sunfab is a world leader in hydraulics. The motivation has been to develop products that are individual in mind. To facilitate and streamline everyday work.

In 90 years, the third generation of the Sundins are still running the company in the spirit of the founder, with a family atmosphere, flexibility and innovative solutions. Sunfab's products are still manufactured in the company's own factory in Hudiksvall, which currently employs 100 people.

Our products are used in mobile lifting cranes, platform loaders, concrete mixers, refuse lorries, snowploughs and many other demanding engineering applications.

We provide quality, on time. Something our customers appreciate!

Hard working motors with high performance

Sunfab Compact Motor is a series of axial piston motors specially designed for mobile and industrial hydraulics. Sunfab has almost 900 motor variants that satisfy high performance requirements.

Displacement range of 10–130 cm³/rev, up to 400 bar intermittent working pressure and 8800 rpm. Sunfab motors are available in ISO, SAE (2 and 4 hole), DIN and plug-in designs with splines or key shafts and numerous connection cover options.

Accessories

Accessories for our products. When you have a broad product range, accessories are very important. They facilitate complete solutions that make our customer's work easier. We have a wide range of by-pass valves, flushing and anti-cavitation valves, speed sensors, injectors, splitter gearboxes, power take off's and much more besides.

A global company with a local presence. Our head office is located in Hudiksvall, Sweden. Our subsidiary companies can be found in Germany, France, the UK and Spain; together we form the Sunfab Group. We also sell our products via distributors and direct to customers all over the world.
