## Pressure relief valve Prv 32/42

All hydraulic systems must be equipped with a pressure relief valve.

Sunfab in-line mounted pressure relief valve Prv 32/42 protects the pump and hydraulic system.

Sunfab Prv 32/42 supports working pressures of 3700-4600/4600-6000 psi and have a capacity for a flow of 39.6 gpm .

Sunfab Prv 32/42 is mounted close to the pump to protect against pressure surges. Assembly is simplified by the through pressure connection at the same time as the need for adapters and nipples is minimised.

Other advantages offered by Sunfab Prv 32/42:

- Pressure gauge socket facilitates adjustment and trouble shooting on the hydraulic system
- Preset opening pressure of 4600/6000 psi
- Compact design

## Versions, main data

| 1. Type |  |
